RoyalBaking Powder

Imparts Healthfulness the Food

Royal Baking Powder possesses peculiar qualities not found in other leavening agents, which arise from the superior fitness, purity and healthfulness of its ingredients.

Royal Baking Powder leavens the food perfectly by its own inherent power without changing or impairing any of the elements of the flour.

Thus the hot-breads, hot-rolls and mussins, and the delicious hot griddle-cakes raised by the Royal Baking Powder are wholesome and digestible, and may be eaten without distress, even by persons of delicate digestion.

ROYAL BAKING POWDER CO., NEW YORK

LOOKING GLASSES.

"How is a looking glass made?" was just fool a little with a cigarette. His pair of chickens, he thinks, are quite unique, for they are twins, five to the Washington Star to a large at all. If they really mean it, let them take to cigars and pipes. I know a dignified old lady, a Polish countess "most of the glass used in this trade is prepared for us at a molding factory, amojisky—it ends in "isky," anyhow rather a large egg, but no one thought the manufacturer. and we merely cut, bevel and silver it —and I respect that woman. She gen-much about it until one morning in our works. All the bevels are cut uinely smokes, and no mistake about farmer saw two bills instead of in our works. All the bevels are cut in ly smokes, and no mistake about in the same way, first with sand and it. There is no playing there. She water, then on an emery wheel and afterward put through several process—afterward put through several process—a long pipe with a wooden stem and entiricated the twin chicks, wrapped ed.

SURED FOR MILLIGHS.

The Prince of Wales Carries Policie Aggregating \$10,000,000-His Death Would Benefit Many Persons Outside

A big insurance man told me recently a New Lork that the Prince of Wales was the heaviest risk of any patron of death would cost English, German, French and American companies not less than \$10,000,000.

"No other person carries 20 per cent paratively little of it is for the benefit of his family; perhaps not more than security for money loaned. If he should ever pay his debts they would of course revert to him, and might be carried for he benefit of his family, but his premiums, like the premiums on all of the royal families of Europe, are very high much higher than those paid by pri-

insurance friend, who spends a good 000,000 or \$3,000,000 of insurance, perhaps more than that, has been placed on the life of the Prince of Wales as a speculation by persons who do not know him and have never had any relations with him whatever. This would not be possible under the insurance laws of the United States, but it is allowed by some of the English compaa policy on the life of a neighbor, provided he can persuade the neighbor to submit to a medical examination or find a company which has recently had him examined. Thus when the Prince of Wales undergoes an examination for life, or get certified copies of the rethem with other companies. It is pure speculation. They pay a high pre mium, a margin, so to speak, or, to pu It in another way, they book a wag with the insurance companies that th

Distinction in Umbrellas It is no new thing to hear that Chir was ahead of the rest of the world in invention. Even the umbrella owes its existence, we are told, to the of the Chinese or Japanese. It is to have been copied from a shad ing tree, and at first received the same veneration accorded to the tre which it was a copy.

Great dignitaries were allowed pear in public seated under un canopies, and later these canopies made portable, until a regular series of umbrellas became necessary. By the umbrella a Chinese gentieman is allowed to carry, one who is initiated can tell his rank. The common people may use an umbrella if it is not made of cloth or silk, but only of paper. If in China one sees a processi headed by two enormous silk umbrel-

las, he may be assured that a governor general of a province or a military officer of the first rank is coming behind

carried. It is said that formerly, when the emperor went hunting, he had to be areceded by twenty-four umbrellas. It hardly seems as if the hunt could have been very successful,

Importations from America have caused the horse raisers of Holstein to suffer much of late. A stock company has been formed in Berlin for the express purpose of importing horses from the United States. The Americans have succeeded in breeding a horse which compares very favorably in every way with the Holstein animal, especially in those points so highly prized in a work horse, namely, broad sips and large build generally. The best markets for Holstein horses has always been the provinces of Saxony, Thuringla and Brunswick. The de mand is created by the large sugar fac-tories. This market has been decreasing of late, owing to American horses being purchased in Berlin. A few days ago, this Berlin company shipped a drove of eighty through Hamburg en route for Milan, Italy, where they are to be used on the tramways. Almost every week, a long freight train filled with American horses leaves the Berliner Bahnhof for various parts of Germany. In spite of expensive freight and a tariff of \$7 per head, the Americans have built up a very respectable
